HOT TUBS

AMERICAN MADE. CELTIC TOUGH

WITH OVER 10 DECADES OF INDUSTRY EXPERTISE,

Celtic Hot Tubs is dedicated to providing the highest quality product with long-lasting performance and dependability; a durable product engineered with customer satisfaction in mind. Our spas come fully loaded with many of the same features you see in a high-end luxury hot tub, but at a more affordable price.

Every member of our team is dedicated to meeting high standards of customer service.

TRISKELION HYDROTHERAPY SYSTEM

NEW LOW PROFILE TECHNOLOGY

Increased Power and Performance, with exceptional comfort

Ancient Celtic Symbology suggests that a three sided symbol illustrating motion also can relate to the concept of Spirit, Mind and Body. Our Turbo Boost Whirlpool System offers a passive therapy benefit from the rotating body of water within the hot tub. The alternative setting incorporates the full collection of the Triskelion jets that vary in size and style resulting in a targeted pin point therapy to the different muscle groups within your body.

Overall, the experience of simply soaking in crystal clear hot water, add-in the twist of a whirlpool, or the deep penetrating heat created by the jets and you'll relate to the primary benefits of hydrotherapy and how they improve your Spirit, Mind and Body.

CELTIC CLEAN WATER MANAGEMENT SYSTEM

With one of the industry's state-of -the-art electronic control systems, the Celtic Hot Tub will start itself twice daily for a period of time you can easily select. During this filter cycle, as we refer to it, the pump will operate at a quiet and high-flow setting, where it will run cost efficiently while it skims water from both the lower level of the tub and more importantly, directly from the water's surface as it skims off any floating particulates that would otherwise form a water line. Next, all the water is sent through the exclusive Silver Lining Micro Screen Cartridge and treated by the Celtic Clean Mineral cartridge (optional). For centuries, Earth's natural minerals, like silver and zinc, have been known for their natural qualities to kill bacteria and help the clean water.

Perhaps best of all, every **CELTIC CLEAN SYSTEM** includes a built-in Ozone Generator, and a very special reaction chamber that allows the ozone to environmentally and safely breakdown to pure oxygen.

Whenever the hot tub is running, Celtic Clean is working as it oxidizes finite sized particles, kills bacteria and significantly reduces the amount of chlorine or bromine required.

SAFETY AND EFFICIENCY

Built for Relaxation. Certified for Protection.

Every Celtic Hot Tub is certified to meet rigorous North American safety standards, giving you confidence with every soak. From electrical systems to advanced anti-entrapment engineering, each component is carefully designed to safeguard you and your family — without compromising comfort or power.

THE RESULT:

- Optimized heater performance
- Efficient pump operation
- Insulation systems engineered to retain heat
- Reduced overall energy consumption

The Mystic 118 blends form and function with a spacious square layout that offers defined seating and enhanced comfort. Thoughtfully contoured positions provide a more structured soak, while the upgraded jet count delivers targeted hydrotherapy across key muscle groups. With its balance of design, performance, and everyday usability, the Mystic creates a refined experience for both relaxation and recovery.

6 Seats CLOVER 240

Designed for those who want the ultimate in space and performance, the Clover 240 delivers a commanding spa experience. Its expansive square layout provides generous room for multiple bathers, while 40 jets and dual 4HP pumps create powerful, full-body hydrotherapy. Built on a 220V platform, the Clover is engineered for deeper pressure, faster heating, and uncompromising performance – making it the pinnacle of the Classic Series.
