

ICELANDIC
WELLNESS

Elemental Healing from the Land of Light

In the quiet heart of Iceland, where geothermal waters rise through ancient stone and snow melts into crystalline springs, the ritual of Soaking is sacred.

A time not just to warm the body—but to still the soul.

A well known symbol in Icelandic Folklore is Vegvísir, (VEGG-vee-seer) who is the Wayfinder. From the Icelandic words Vegur which means Way, Road or Path, and Vísir which is translated as Guide.

OUR MISSION IS SIMPLE:

Bring the purity of Iceland's wellness tradition into
your daily life, one soak at a time.

Laguz (LOOG-OOZE) is symbolic of water and the flowing movement of a river, and is connected to healing and renewal. It is associated with intuition and the subconscious mind.

IN ICELAND, WARMTH IS MORE THAN COMFORT—IT IS ESSENTIAL.

Surrounded by cold air, snow, and sea, Icelanders have long turned to geothermal waters as a source of restoration, gathering in naturally heated pools to relax, recover, and reconnect.

Fed by the earth's volcanic energy, these warm waters rise from deep below the surface, rich in minerals and naturally soothing to the body. For generations, soaking has been a daily ritual—an opportunity to slow down, release tension, and embrace a quieter pace of life.

This tradition is rooted in balance. As the body absorbs heat, muscles begin to relax, circulation improves, and the mind follows—settling into a state of calm that extends well beyond the water.

FROM FIRE TO ICE, WELLNESS BEGINS IN CONTRAST.

THE WELLNESS FACTOR

BENEFITS OF SOAKING IN AN ICELANDIC HOT TUB

Step into the warm, soothing waters of your hot tub and feel worries melt away. The gentle embrace of heat and buoyancy eases tension from head to toe, helping muscles relax and joints move more freely. As circulation improves, your body finds natural relief, leaving you refreshed and restored. But the benefits go beyond the physical. A quiet soak creates a sanctuary for the mind, washing away daily stress and inviting deep relaxation. Many find that a short evening ritual in the hot tub promotes more restful sleep, turning ordinary nights into moments of true renewal.

MUSCLE RELAXATION

The heat from a hot tub can help relax tight muscles, reducing soreness and stiffness, which can be especially beneficial after exercise.

DETOXIFICATION

The heat from a hot tub can cause you to sweat, helping your body eliminate toxins through the skin.

JOINT HEALTH

Hot tubs can improve joint mobility and flexibility, making it easier to move and reducing the risk of injury.

CARDIOVASCULAR HEALTH

Increased heart function and improved blood flow can have positive effects on cardiovascular health.

PAIN RELIEF

Hot tubs can be particularly helpful for those with arthritis, fibromyalgia, or chronic pain.

The warm water and massage jets can ease muscle tension, reduce joint pain, and improve flexibility.

STRESS RELIEF AND BETTER SLEEP

The relaxing effects of warm water and massage can help lower stress levels and promote a sense of calm, leading to better sleep quality.

Before starting any hydrotherapy routine, especially if you have pre-existing health conditions, it's essential to consult with a healthcare professional.

AWAKEN YOUR BODY. SHARPEN YOUR MIND.

In Iceland, the ritual of alternating between hot and cold water is more than a practice—it's a way of life. For centuries, Icelanders have immersed themselves in glacial rivers and natural springs, embracing the powerful contrast between heat and cold to restore both body and mind.

This tradition, rooted in the island's unique geothermal landscape, is built on balance. Warmth relaxes the muscles and opens the body, while cold water delivers a sudden, invigorating shock—stimulating circulation, reducing inflammation, and awakening the senses.

Today, cold plunge therapy is celebrated around the world for its ability to enhance recovery, improve mental clarity, and build resilience. For Icelandic, it remains something deeper: a moment of stillness, a connection to nature, and a daily reset

FROM FIRE TO ICE, WELLNESS BEGINS IN CONTRAST.

UNLOCK THE BENEFITS OF A COLD PLUNGE

A cold plunge is a form of hydrotherapy where the body is immersed in cold water—typically 50–59°F—for short periods of 1 to 5 minutes. Rooted in traditions from Scandinavian ice baths to Japanese onsens, it's valued today for reducing inflammation, accelerating recovery, improving circulation, and boosting overall well-being through endorphin release.

MENTAL

MENTAL WELL-BEING

Refresh your mind and reset your mood—cold therapy promotes clarity, focus, and a more positive outlook.

BUILDS DISCIPLINE

Step in, stay present, and commit—cold therapy strengthens mental toughness one plunge at a time.

BUILD RESILIENCE

Training your body to adapt to stress creates a stronger, more resilient you—inside and out.

REDUCES SYMPTOMS OF ANXIETY

Cold exposure helps calm the mind, regulate stress responses, and promote a more balanced, centered state.

IMPROVES SLEEP QUALITY

By regulating stress and supporting recovery, cold exposure helps you unwind faster and sleep more deeply.

PHYSICAL

IMPROVED CIRCULATION:

Cold exposure stimulates blood flow, helping deliver oxygen and nutrients more efficiently throughout the body.

ENHANCED RECOVERY:

Reduce soreness and bounce back faster—cold therapy helps minimize inflammation after physical activity.

BOOSTED IMMUNE FUNCTION:

Regular cold exposure may support a stronger immune response, helping your body stay balanced and resilient.

WEIGHT MANAGEMENT

Cold exposure can activate brown fat, helping your body burn energy more efficiently and support metabolic function.

Before starting any cold exposure routine, especially if you have pre-existing health conditions, it's essential to consult with a healthcare professional.
